We Prune Trees Year Round...

Professional pruning is the best way to prepare your trees for the onslaught of winter. Tree branches are subject to winter winds and ice and snow build-up. Tree crowns form virtual walls that wind can barely penetrate, causing weak limbs to break. Ice and snow add a tremendous amount of weight to limbs, which can also cause them to break, especially if we have an early-season storm before the leaves drop. Professional pruning prepares your trees to stand up to winter and survive.

We Can Keep Your Evergreens Green Even In Winter

Leaves turn color and drop on some trees and shrubs but they aren't supposed to on evergreens. Be sure your evergreens don't turn brown and drop leaves or needles this winter. Join the many property owners who depend on us to protect their evergreens with antidesiccant.

Pines and other needled evergreens aren't the only ones that need antidesiccant. Broadleaf evergreens like rhododendrons also need this treatment.

Antidesiccant is a wax-like material that we spray on evergreens to reduce water loss that results in winter burn.

KEEP YOUR EVERGREENS GREEN. CALL 402-558-8198 NOW TO SCHEDULE YOUR TREATMENT.

Watering Established Trees

GUIDE FOR TREES OVER 3 YEARS OLD.

How often you water depends on the size of the tree, soil conditions and weather conditions. The best way to determine when trees need water is to check the soil.

- A deep soaking every 2 weeks is adequate for most trees.
- Focus on watering the entire area beneath the tree's "Drip Line".
- Let the water run in one area until the top 8-12 inches of soil is moistened. Move sprinklers as needed to water the entire area underneath the tree's canopy.
- The goal is for moist (not soggy) soil. Deep watering allows critical root zone to take up adequate moisture.

Plant a New Tree this Fall!

We believe that for every tree removed, a new tree should be planted. With that in mind we are pleased to offer our customers a diverse selection of Nebraska grown trees. You don't even have to lift a hand, ask our certified arborists from Hughes Tree Service about installing your new tree.

CALL 402-558-8198 TO ORDER YOUR NEW TREE!

Thomsen Blue Spruce \$375.00

Mature Height: 40 ft. **Mature Width:** 15 ft.

Exceptionally bright, thick, silver-blue needles on a stiffly pyramidal evergreen conifer. Horizontal branches reach to the ground. Form becomes more open with age.
